To the US Embassy in the Republic of Kazakhstan

Dear Mr. Ambassador,

The Trade Union of the Republic of Kazakhstan, SPK "AMANAT," expresses serious concern regarding reports of attacks on civilian infrastructure and industrial facilities in the Islamic Republic of Iran.

According to available information, these attacks have damaged and destroyed industrial facilities, including steel mills, as well as social institutions, including educational institutions. Such incidents are deeply troubling, as they directly affect workers' rights, depriving people of jobs, stable income, and safe living conditions.

The Trade Union of SPK "AMANAT" emphasizes that attacks on civilian objects and infrastructure not intended for military use are unacceptable and contrary to international humanitarian law, as well as the fundamental principles of human rights and labor protection.

In this regard, we consider it necessary to:

- ensure strict compliance with international law and the principle of protecting the civilian population;
- Prevent attacks on civilian and industrial infrastructure;
- Take effective measures to prevent further destruction of enterprises providing employment;
- Facilitate the restoration of damaged facilities and protect workers' rights;
- Support an objective international assessment of the incidents that occurred. We believe that protecting civilian lives and maintaining working conditions cannot be considered secondary issues under any circumstances. The AMANAT SPK Trade Union intends to continue to consistently defend workers' rights internationally and counts on the responsible position of the United States of America on these issues.

Sincerely,

AMANAT SPK Trade Union

Republic of Kazakhstan
